Projet : Gestionnaire de tâches avec Laravel

Plan

- 1 - Partie statique
- 2 – Authentification
- 3 – Système de CRUD

1- Partie statique

*** Template : master.blade.php(resources/views/layout)***

```
master.blade.php X
resources > views > layout > master.blade.php
17
18     margin-top:20px;
19     color:white;
20 }
21 .text{
22     font-size:12px;
23     color:white;
24 }
25
26 img{
27     width:60px;
28 }
29
30 body{
31     background-image: url('img/fondq.jpg');
32     background-size: cover;
33     background-repeat: no-repeat;
34     font-family: 'Numans', sans-serif;
35 }
36 </style>
37 <link rel="stylesheet" href="/css/app.css">
38 </head>
39 <body>
40 <p class="text-center"><b> Gestionnaire de tâches </b></p>
41 <center>
42 
43 </center>
44 <br>
45 @include('layout.navbar')
46 <div class="container">
47     @yield('content')
48 </div>
49 @include('layout.footer')
50 @yield('script')<script src="/js/app.js"></script>
51 </body>
52 </html>
```

Navbar (resources/views/layout)

```
navbar.blade.php X
resources > views > layout > navbar.blade.php
32     float:left;
33 }
34 .nav li a:hover{
35     background:transparent;
36 }
37 .nav{
38     margin-top:5px;
39     font-size:20px;
40 }
41 img{
42     width:60px;
43 }
44 </style>
45 </head>
46
47 <body>
48 <nav class="navbar navbar-expand-sm bg-primary">

26     </div>
27 @endsection

```

Leurs differentes routes ***

```

15
16 Route::get('/', function () {
17     return view('accueil');
18 });
19
20 Route::get('apropos', 'AproposController@getPropospage');
21 Route::get('contact', 'ContactController@getContactpage');
22 Route::post('contact', 'ContactController@postcontact');
23
24

```

2 - Authentification

Mise en place grâce à la commande : **php artisan ui bootstrap –auth**

3 – Système CRUD

vue (resources/views/taches):

```

contact.blade.php  web.php  index.blade.php x
resources > views > taches > index.blade.php
23 <div class="container">
24     <div class="row justify-content-center">
25         <div class="col-md-8">
26             <div class="card">
27                 <div class="card-header">{{ __('Tableau de bord') }}</div>
28                 @foreach ($datas as $data)
29                     <div class="alert alert-{{ $data->accomplie ? 'success' : 'primary' }}" role="alert">
30                         <div class="row">
31                             <div class="col-sm">
32                                 <strong>{{ $data->titre }} @if($data->accomplie)<span class="badge badge-success">accomplie</span></strong>
33                             </div>
34                             <div class="col-sm form-inline justify-content-end">
35                                 @if($data->accomplie == 0)
36                                     <form action="{{ route('taches.faireaccomplie', $data->id) }}" method="post">
37                                         @csrf
38                                         @method('PUT')
39                                         <button type="submit" class="btn btn-success mx-1" style="min-width:115px;">accomplie</button>
40                                     </form>
41                                 @else

47                                 @endif
48                                 <a href="{{ route('taches.edit', $data->id) }}" class="btn btn-primary mx-1" role="button">modifier</a>
49                                 <form action="{{ route('taches.destroy', $data->id) }}" method="post">
50                                     @csrf
51                                     @method('DELETE')
52                                     <button type="submit" class="btn btn-danger mx-1">supprimer</button>
53                                 </form>
54                             </div>
55                         </div>
56                     </div>
57                 @endforeach
58                 {{ $datas->links() }}
59             </div>

```

Controller (app/http/controllers/GestionController) :

The screenshot shows the `GestionController.php` file in Visual Studio Code. The code is as follows:

```
33 }
34 return view('taches.index', compact('taches'));
35 }
36
37 /**
38  * Show the form for creating a new resource.
39  *
40  * @return \Illuminate\Http\Response
41  */
42 public function create()
43 {
44     return view('taches.create');
45 }
46
47 /**
48  * Store a newly created resource in storage.
49  *
50  * @param \Illuminate\Http\Request $request
51  * @return \Illuminate\Http\Response
52  */
53 public function store(Request $request)
54 {
55     $nouvelletache = new Tache();
56     $nouvelletache->titre = $request->titre;
57     $nouvelletache->expiration = $request->date;
58     $nouvelletache->description = $request->description;
59     $nouvelletache->save();
60
61     return redirect()->route('taches.index');
62 }
63
64 /**
65  * Display the specified resource.
66  *
67  * @param int $id
68  * @return \Illuminate\Http\Response
69  */
70 public function show($id)
71 {
72 }
```

Route

The screenshot shows the `routes/web.php` file in Visual Studio Code. The code is as follows:

```
8
9
10 Here is where you can register web routes for your application. These
11 routes are loaded by the RouteServiceProvider within a group which
12 contains the "web" middleware group. Now create something great!
13
14 */
15
16 Route::get('/', function () {
17     return view('accueil');
18 });
19
20 Route::get('apropos', 'AproposController@getPropospage');
21 Route::get('contact', 'ContactController@getContactpage');
22 Route::post('contact', 'ContactController@postcontact');
23
24
25 Auth::routes();
26
27 Route::get('/home', 'HomeController@index')->name('home');
28
29
30 Route::resource('taches', 'GestionController');
31 Route::get('accomplie', 'GestionController@accomplie')->name('accomplie');
32
33 Route::put('taches/faireaccomplie/{taches}', 'GestionController@faireaccomplie')->name('taches.faireaccomplie');
34 Route::put('taches/fairennonaccomplie/{taches}', 'GestionController@fairennonaccomplie')->name('taches.fairenonaccomplie');
35
```
